PROFILE

I am a highly communicative and inventive individual with strong leadership, perseverance, and a solid work ethic. I have experience working with C++, C#, and Java, as well as practical knowledge of QT and Unity. Motivated by challenges, I continuously push myself to learn and grow, particularly in AI, and thrive in both independent and team-based environments. My ability to quickly adapt and self-learn makes me a valuable asset in dynamic settings.

EDUCATION

Bachelor of Science in Applied Mathematics (Expected 2027), Belarussian State University, Minsk
SEPTEMBER 2023 — MAY 2027

Currently pursuing a degree in Applied Mathematics, focusing on computational techniques, mathematical modeling, and data analysis. Gaining strong foundational knowledge in algorithms, programming, and statistical methods. Actively involved in academic projects and coursework that apply mathematical theories to real-world problems.
